Jakarta, Indonesia | +628999418242 | agusjamaludin91@gmail.com | www.linkedin.com/in/jamaludin1935

Profile

Results-driven Data Science Leader with over 9 years of experience driving data strategy, architecture, and advanced analytics across the mining and enterprise sectors. Proven expertise in building scalable data ecosystems, leading cross-functional teams, and delivering AI and predictive solutions that translate complex data into measurable business impact. Skilled in guiding end-to-end data initiatives — from architecture and pipeline design to model deployment and visualization — to support strategic decision-making and digital transformation.

Experience

Data Scientist Lead | PT Petrosea Tbk. | Jakarta, Indonesia | October 2022 - Present

- Led the design and implementation of enterprise-level data architecture integrating operational, financial, and IoT data across mining sites, improving data accessibility and governance.
- Led the migration of data warehouse, Power BI dashboards, and middleware tools, ensuring a seamless and efficient transition.
- Led the design and implementation of enterprise-level data visualization development, focusing on simplicity and storytelling that speeds up insight generation by 30-50%.
- Led the design and implementation of various advanced analytics and ML solutions including, predictive maintenance, data extraction automation, and GenAI-powered safety reporting and contract assistance delivering up to 30% higher production efficiency, 70% faster data processing, and 90% improved accuracy.
- Managed and mentored a team of data professionals, including DBAs, data engineers, data analysts, and data scientists, fostering a collaborative and high-performance culture that increased project delivery efficiency.
- Established data solution standards including data integration, advance data analytics and data visualization practices ensuring scalability, reliability, and compliance across projects.

Senior Data Scientist | PT Petrosea Tbk. | Jakarta, Indonesia | October 2020 - October 2022

- Design and implement various advanced analytics and ML solutions including mining optimization, incident report classification, delivering up to 30% higher production efficiency.
- Research and development efforts to build machine learning model to detect fatigue, improving safety productivity.

Data Scientist | PT. Metrodata Electronics Tbk. | Jakarta, Indonesia | July 2019 - October 2020

- Designed and implemented advanced analytics and ML solutions such as bank product recommendation, churn analysis, and fraud detection providing a 360° customer view, enabling personalized product offerings, supporting targeted retention strategies, and enhancing proactive fraud prevention through early detection of suspicious transaction patterns.
- Designed and implemented social media data crawling and sentiment analysis, collecting posts, comments, and related content to deliver insights into public perception, enabling organizations to strengthen brand trust and communication strategies.
- Mentored a team of data scientists, fostering a collaborative and high-performance culture that increased project delivery efficiency.

Data Scientist | Hitachi Ebworx Sdn. Bhd. | Selangor, Malaysia | February 2018 - May 2019

- Designed and implemented a predictive model to determine whether insurance claims should be approved or rejected, delivering actionable insights that enhance decision accuracy and operational efficiency.
- Built an automated data extraction system for scanned payslip and insurance policy document images, achieving significant time savings and eliminating manual data entry efforts.
- Mentored a team of data scientists, fostering a collaborative and high-performance culture that increased project delivery efficiency.

Data Scientist | Ebdesk Malaysia Sdn. Bhd. | Selangor, Malaysia | September 2015 - January 2018

- Developed an automated system to collect and analyze product prices from online marketplaces, enabling faster data acquisition, improving visibility into price distribution, and supporting price trend prediction for online markets.
- Implemented automated data pipelines to gather online news and social media content on targeted topics, accelerating data collection and delivering actionable insights through sentiment and trend analysis.
- Mentored a team of data scientists, fostering a collaborative and high-performance culture that increased project delivery efficiency.

Education

Bachelor Degree of Science in Mathematic | June 2010 - February 2025 | State Islamic University Of Sunan Gunung Djati Bandung, Indonesia | GPA 3.47/4.0

Certification

Certified International Specialist In Data Visualization - Pasas Institute

Credential ID: CISDV14158

Microsoft Certified: Azure AI Fundamental - Microsoft

Credential ID: I213-6581

Microsoft Certified: Azure Data Fundamental - Microsoft

Credential ID: H968-9490

Program Professional Academy – Digital Talent Scholarship 2021 – Data Scientist – Kementrian Komunikasi dan Informatika Republic Indonesia

Credential ID: 091316107121-137/DTS/BLSDM.KOMINFO/12/2021

Achievement

Challenge Winner – Sound the Alarm V2 - 2021– **humyn.ai**

Best Presentation – Turnamen Sains Data Nasional (TSDN) - 2021 – **Data Academy**

First Winner – Turnamen Sains Data Nasional (TSDN) - 2022 – **Data Academy**

CADS Sunrise Awards - Rising Data Science in ASEAN – 2022 - **The Center of Applied Data Science**

Skills & Abilities

- | | | |
|----------------------|-------------------------------------|----------------------|
| • Data Management | • Machine Learning | • Python Programming |
| • Data Strategy | • Time Series Analysis | • R Programming |
| • Data Architecture | • Statistics | • PowerBI |
| • Data Engineering | • Natural Language Processing (NLP) | • Tableau |
| • Data Integration | • Text Mining | • Azure Data Factory |
| • Data Visualization | • Computer Vision | • SQL |
| • Data Analytics | • Generative AI | • Azure Cloud |
